

# Airline Tickets Accounting

**GATS ONCE** will control all airline tickets and travel services and automatically generate *Journal entry* for all transactions.

Also **GATS ONCE** will automatically generate *Invoice* for **issued / reissued / refund** tickets and **travel services** then print it to the destination printer.

**GATS ONCE** will imports data from all **GDS** immediately after issuing the ticket with the possibility to post journal entries and print invoices automatically.

**GATS ONCE** will support the system users with many reports, for employees, and management, categorize by:

- 1) **Airline Reports** such as: Airline sales details, Airline sales totals, Total Airline Sales, Airline comparison report, Credit card report, Tour code report.
- 2) **Customer Reports** such as: Customer sales & refund, Totals customer sales, Customer tickets data, Customer total sales on airline.
- 3) **Tickets Reports** such as: Employee sales, Total employee sales, Request serial report, and Employee comparison.

**BSP GATS Comparison** adding on module will compare airline tickets from **BSP Invoice** with airline tickets in **GATS ONCE** to identify:

- 1) Tickets found In **BSP** & not found In **GATS**
- 2) Tickets found In **GATS** & not found In **BSP**
- 3) Tickets found In **GATS** & **BSP** but different

Also prepares **ACM & ADM** and generate GL payment entry.
