

IMAS

OnLine
Version

IMAS Inventory **M**anagement and **A**dministration **S**ystem

An integrated computer system effectively manages all the various activities of the Department of stores and suppliers and all the information items and follow-up stores and transfers the cost centers and receives feedback and the items and calculates the average price and inventory storage.

IMAS Designed to allow its use in companies and subsidiaries or group companies, sister of the overlapping of several departments and users, either through networks or using a single device in addition to use in the branches established divergent and with this amount of information the system will collect, organize, and output reports and statistics detailed and consolidated without significant effort from the user.

Was also taken into account when designing **IMAS** the size of the company where there is the version for one user and a version that works on up to three users and a version that works on the network for more than three users and taking into account the nature of work in each company and the size of Data and the number of users with the possibility of increasing the number of users in any time.

Flexibility of use

IMAS system is designed to bend himself to the service user to the system and not vice versa and the **IMAS** data processing companies and several branches and several financial years, without a little effort. In addition, all reports of **IMAS**, which serve all levels of management can be viewed on the screen before printing and can print one page or more of the report and to provide time and cost of printing and the ability to print more than one copy of the report, the one and to any printer connected to the internal network. And also the user can work on more than a year at the same time and using the capabilities available to the **IMAS**, which allows the existence of an infinite number of years in the system and to extract statistics from previous years, both of the items or suppliers.

Multi-language

IMAS is characterized by the possibility of any choice between Arabic and English in both screens or in reports.

Confidentiality of data

IMAS ensure protection and confidentiality of data and information and functions of the various operating through a system of security and confidentiality of an arbitrator from which to determine the function of a particular or specific data the user can access it, or inserting, or modify or cancel, view, or print.

Multiple Branches

IMAS system works on the basis of Multiple branches and it is linked to all the main branches of the center through the Internet without the need for additional hardware or software to make your connection

Multi-Currency conversion rates

IMAS System works on the basis of multiple currencies and multiple exchange rates for the single currency at different times as the user can change them as the need arises.

On Line Help

By viewing the questions and answers via the Internet for many topics to help customers to understanding the system and make the most of the possibilities available in it.

Automatic Error Reporting

By sending automatically e-mail, and contains details of the problem faced by the client to the management of technical support.

Sending mail to Technical Support

Development of a new feature in **IMAS** allows you to send an email to technical support and ask for the query.

Chat with Technical Support

Allows users to communicate with technical support via instant messaging through the Internet to respond to any queries.

On Line documents Archive

Is by attaching a photocopy of each important document when registering their data with the retention and recall optical image when you view or print the data.

Store Dispatch Receipt

IMAS works authorized recording of the store to exchange a set of items with the possibility of registration of an infinite number of movements, according to the date of movement.

IMAS is characterized by the possibility of the definition of an infinite number of varieties can be registered as an infinite number of stores and cost centers so that the extraction of reports by category or group category, or store or cost center.

Items Movement

IMAS working on recording the movement of items for each of the outgoing and transfers with the possibility of registration of an infinite number of movements, according to the date of movement

Receive / Return Items

IMAS works record the receipt and retrieve items to and from the supplier with the possibility of registration of an infinite number of movements, according to the date of movement. Also **IMAS** can also receive the main items on the store or store or on a sub-cost center directly.

IMAS also allows the division of items into groups so they can be the extraction of detailed statistics and a whole according to a group of items.

IMAS is characterized by the possibility of the definition of an infinite number of varieties can be registered as an infinite number of stores and cost centers so that the extraction of reports by category or group or category, or store cost center.

Physical Inventory

IMAS works on the record store and Inventory of and cost center for each item in order to calculate the difference depot the inventory and calculate the consumption in a cost.

Reports **IMAS**

Serves all levels of management reports and is divided into:

Financial reports: Transaction Edit Report, Receiving Edit Report, Item Car Report, Stock Item Report, Variances Report, Dispatch From Stores, Total Dispatch From Stores, Receives to Inventory, Total Receives to Inventory, and Total Receives to Inventory From Suppliers.

Statistical Reports: Stock Evaluation Report, Stock Inventory Report, Total Receiving Report, Locations Inventory Report, Stock Days On Hand, Reorder Level, Consumption Report, Item Quantity Details, Slow Movement Items, Items Expiration, Summary Movement Storage, Movement Items Cancel, Receiving / Return Items Cancel.

Reports of purchases: Item Monthly Purchasing Report, Total Purchasing, Analyze Purchasing on Items / Suppliers, Receiving and Return Purchasing.

General Functions

Using the **IMAS** can keep all the details of the movements that were even after the end of the year and go for another year. The user can enter data at any time of the year and the system automatically adjusts the balances of items based on the inputs and depending on the history and movements can be entered for more than a year at the same time without conflict, and the system will automatically direct the movements of each year on the basis of history.

General System Characteristics

IMAS is characterized by the possibility of any work on most operating systems common in the world and is Microsoft Windows operating system with the use of databases, Microsoft SQL Server, which is characterized as compatible with all file types. Use and can exchange data between different systems, either export or import files Import, Export and in the following images: Character Separated Values, Coma Separated Values (CSV), Data Interchange Format (DIF), Excel Sheet (XLS), HTML, Lotus 123, Paginated Text, Record Style, Rich Text Format (RTF), Tab Separated Test / Values, Text, Microsoft Word Document With the ability to extract data in the image file can be sent directly by e-mail or fax. Center and the items in each depot or cost center and account teams to inventory and calculate the consumption in a cost center.
